

- Crumbs

Fresh from the oven,
every single day.

*A neighbourhood bakery for fresh daily breads and
made to order cakes, built around a simple order pad.*

THE PROBLEM

Ordering a cake is either generic, or a gamble.

Buyers want fresh, personal and reliable. Today they have to pick two of the three.

CONVENIENT BUT GENERIC

The big online bakeries

Bakingo and FlowerAura deliver fast, but it is the same designs for everyone. People are still ordering just vanilla.

PERSONAL BUT FLAKY

Instagram home bakers

You DM to ask, there is no clear menu or price, and you are never sure it arrives on time.

FRESH BUT RARE

A real daily bakery

Fresh bread and bakes from a bakery on your own street are getting harder to find.

THE SOLUTION

Your neighbourhood bakery, with an order pad.

Crumbs is a small bakery that bakes fresh daily and takes cakes to order through one simple pad. Fresh and personal and reliable, together.

FRESH

Baked this morning

Mixed, proved and baked the same day, in small batches, never off an old shelf.

PERSONAL

Made to order

Your cake, your size, your message, eggless if you want. Not a mass tray.

RELIABLE

A clear order pad

See what is fresh, the price and the date. No DM haggling, no guessing.

HOW IT WORKS

From our oven to your table, in four steps.

01

See today's bakes

Open the order pad and see what is fresh today.

02

Place your order

Pick bakes, add a date and message for a cake.

03

We bake it fresh

Baked the same day, in small batches.

04

Pickup or delivery

Collect it warm, or we drop it nearby.

THE MARKET

A large, growing market that is moving online.

\$12-15B

India bakery market in 2025, growing about 9 to 10 percent a year toward \$30B by 2034.

\$2.1B

India cake market in 2025, growing about 13 percent a year, the fastest premium slice.

60M

birthdays a year in India, the everyday engine of cake demand.

Sources: Expert Market Research and IMARC (bakery), Mordor Intelligence (cake), Ken Research (birthdays and online cake delivery). Bengaluru is a top cake city, and customized and eggless cakes are the growth niche.

THE MODEL

One cake earns its keep. Repeat is the engine.

Unit economics, one cake

- **Sells for** about ₹650 for 500g, up to ₹1,200 for 1kg, more for custom.
- **Ingredients and box** about ₹290 for a 1kg cake.
- **You keep** roughly ₹500 plus on a 1kg cake, after materials.
- **Delivery stays cheap** pickup or nearby drop, ₹0 to ₹60, not a city-wide courier.

Why it compounds

- **Daily bread brings them back** small repeat orders from the same street, every week.
- **Occasion cakes are high margin** birthdays and anniversaries, planned and pre-paid.
- **Eggless widens the base** about half of cake orders ask for eggless.
- **No app, no gateway** the order pad and UPI keep costs near zero.

Illustrative figures for a student build, not audited results.

TRACTION

Early signs from one street.

60

cakes baked to order, with 9 of 10
customers reordering or referring a friend.

40

daily-bread regulars on the street, ordering
through the pad each week.

~50%

of cake orders choosing eggless, a base the
big chains underserve.

Illustrative early traction for a student pilot, shown to demonstrate the model.

WHY NOW

The moment is right for a small, local bakery.

Why now

- **AI and UPI** let one baker run a clean order pad with no app and no payment gateway.
- **Quick-commerce trained the habit** people order cakes online now, and want fresh and personal, not just fast.
- **Premium and eggless are rising** the fastest-growing, highest-margin slice of the market.

Where Crumbs wins

- **vs Bakingo and FlowerAura** fresh and local and made to order, not the same design shipped from far away.
- **vs Instagram home bakers** a clear menu, price and date, and reliable pickup or delivery.
- **vs chains** a real neighbourhood bakery with a face, on your street.

THE ASK

Help us fill the neighbourhood, then the city.

100

founding neighbourhood customers for daily bakes and cakes.

A mentor

a working baker or food entrepreneur to guide the kitchen.

₹5L

to set up the kitchen, packaging and nearby delivery.

Fresh from the oven, every single day.
