

Sales: Lead Qualification Policy

Orange Caterpillar Pvt Ltd · Sales Operations · reference document

What we sell

We sell a workflow-automation platform that helps business teams replace manual, repetitive processes. A good lead has a real workflow to automate, someone who can decide, a budget, and a timeline.

Your task

Twenty-five inbound enquiries have arrived. Read each one, pull out the fit signals, score it, band it, route it to the right owner, and note the next action. Order the list so the best opportunities are worked first. Nothing is contacted without a human.

How we score a lead

Each lead is scored out of 100 against five weighted criteria. Use these to score fairly:

Criterion	What we look for	Weight
Need / fit	A real, manual workflow that our platform can automate	35%
Authority	A decision-maker or a manager, not just an unnamed contact	20%
Budget	Budget approved or clearly available	20%
Timeline	Ready now or within the quarter	15%
Company size	Larger teams tend to be worth more	10%

How the score becomes a band: Hot is 75 or more with a named decision-maker and a near-term timeline. Warm is 55 or more. Nurture is 35 or more. Below 35 is Disqualify.

One hard rule: anything that is not a genuine buying enquiry, a job application, a vendor pitch, or a student or research request, is Disqualified no matter how it scores. Nothing is contacted automatically, the agent drafts and a human sends.

Bands, owners, and next action

Each line below maps a band to its owner and the next action.

ROUTE: Hot | Account Executive | Call within 1 business day

ROUTE: Warm | Sales Development (SDR) | Follow up within 2 business days

ROUTE: Nurture | Marketing Nurture | Add to the nurture track; revisit in 30 days

ROUTE: Disqualify | Do not pursue | Send a polite decline or take no action
