

Happy walks, while you are **away**.

On-demand dog walking. Book a vetted walker, follow every walk live on the map, and get a photo report when your dog is home.

THE PROBLEM

A busy day should not trap a dog indoors.

Urban pet parents love their dogs like family, and cannot always walk them.

No time

Long hours and busy days mean the dog misses walks, and the guilt piles up.

No trust

Handing your dog to a stranger is scary, and informal walkers come with no checks.

No visibility

Once they leave, you have no idea where your dog is, or whether the walk even happened.

THE SOLUTION

A vetted walker, a live map, a photo report.

Trot turns an anxious handover into total peace of mind.

Vetted walkers

Background checked, trained and insured, so you can trust who takes the leash.

Live tracking

Follow the entire walk on a live map, with distance and time as they go.

Photo report

A photo, the route and a happy note the moment your dog is home safe.

HOW IT WORKS

From booking to belly rubs, in four steps.

Step 1

Book a walker

Pick a time and a vetted walker near you, on demand.

Step 2

Walker arrives

Your walker checks in and heads out with your dog.

Step 3

Follow live

Watch the full route on a live map, start to finish.

Step 4

Photo report

Home safe, with a photo, the route and a friendly note.

THE MARKET

A pet boom, and an open lane.

\$1B

India pet services market by 2030, up from about \$485M in 2023, growing 11 percent a year.

30M+

pet dogs in India today, on the way to about 43M by 2026.

No one

owns on-demand dog walking in India yet. The lane is wide open.

Sources: Grand View Research (pet services), Dogster and India Briefing (pet dogs and humanization).

THE MODEL

Earn per walk, grow with the block.

How it earns

- A fee per walk, with a take rate between the pet parent and the walker.
- Walk packs and plans, a daily-walk subscription for regulars.
- Add-ons later, sitting, grooming and vet runs once trust is built.

Why it grows

- Density wins, more walkers and parents per neighbourhood lowers wait times.
- Habit forms fast, a dog needs walking every single day.
- Trust travels, pet parents talk, and a safe walk gets shared.

Illustrative model for a student build, not audited results.

TRACTION

Tails wagging, one block at a time.

500

walks completed in one Bengaluru neighbourhood pilot.

70%

of parents booked again within the same week.

4.9

average walk rating, with photo reports on every single walk.

Illustrative early traction for a student pilot, to show the model.

WHY NOW

The timing has never been better.

Why now

- **Pets are family**, double-income, nuclear, urban households dote on their dogs.
- **Phones make it easy**, live GPS and photo reports are simple to build and expected.
- **The space is open**, no Indian player owns on-demand walking yet.

Where Trot wins

- **vs informal walkers**, vetted, tracked and insured, not just word of mouth.
- **vs doing it yourself**, reliable help on the busy days, with full visibility.

THE ASK

Help us earn the first thousand happy walks.

100

founding pet parents in one Bengaluru neighbourhood.

20

vetted, trained walkers to build a reliable supply.

Capital

for vetting, insurance and the first marketing push.

Happy walks, while you are away.
